PIG PILLOWS, PANS & LOOSE

PIG Loose Absorbents are cleaner, safer and more efficient than clay.

Some messes clean up better with loose. With lightweight, highly absorbent, chemically resistant options, we've got you covered! You'll NEVER have to resort to clay.

- Spend less time and money **cleaning up spills of oils, coolants, solvents and water** with PIG Universal Loose Absorbents.
- Our Loose Oil Absorbents are **perfect for oil spill clean-up** without taking on a drop of water.
- PIG HazMat Loose Absorbents are specially formulated to **stand up to corrosive materials**.

Six reasons to stop using clay and switch to PIG Loose Absorbents!

- ① Clay doesn't absorb. It just becomes coated with liquid that can seep through.
- ② Clay is heavy: A bag can weigh 18–22kg — and it's hard to carry, sweep and shovel.
- ③ It is abrasive. Gritty particles can damage machine parts.
- ④ Clay sticks to your shoes. So you end up tracking it all over your site.
- ⑤ It's a health hazard. Some clay contains silica that can cause lung damage.
- ⑥ Disposal is expensive, messy and labour intensive.

PIG Pallets and Decks are best in class.

We understand what you need and build it into every product: That's the PIG Quality Advantage. Our pallets and decks offer features you won't find anywhere else!

1. Unsurpassed Strength:

Every PIG Pallet and Deck is built to support the maximum load long-term. Even fully loaded, our products won't bow, buckle or break!

4. Proven Chemical Compatibility:

Our pallets and decks are compatible with every type of liquid you need to store, whether it's corrosive, oily or anything in-between.

2. Thickest Grates on the Market:

Anti-slip structural grates on our Heavy-Duty Pallets add incredible strength - ours won't bend like cheaper alternatives!

5. Rigorous Testing:

We subject all of our products to more punishment than you can ever dish out, so you can be sure that, when we say a pallet can stand up to a 4,000 kg. load, it can.

3. Lowest Loading Height:

A low pallet height means less effort to load and unload drums safely on and off the pallet.
